To: Mr. Andrew D. Meikle (Reg. No. 32,868)

From: Stephen Blau (Patent and Trademark Office)

Date: 10 March 2004

Encl: This and seven other pages

Subj: 09/295,273 (Attorney Docket No. 2927-0103P)

This proposed amendment (enclosure (1)) would overcome the obviousness of U.S. 5,735,753 having bias layers with N being greater than one in the form of 2.5 (Col. 5, Lns. 11-20). This would be combined with 3-82486 (enclosure (2)) which shows the teaching of having the same number of turns and thickness for bias layers along the entire length of a shaft and having opposing bias layers offset by .5 turns. U.S. 6,106,413 discloses making offset bias layers into one prepeg (Col. 10, 57-67). Please call me to agree or suggest changes (703-308-2712).

  
Sincerely, Stephen Blau
